Review:

The mountain bike trails in "The Basin" area of the Khancoban Country Club offer a variety of challenging and fun trails suitable to more experienced riders. The trails are maintained by a small number of mountain bike riders in Khancoban and are all hand cut and cleared.

There may be sections that get overgrown and this can make following the trail harder the first time you ride them. There is limited signage, but most trails have marker tape in the trees indicating the correct line.

All trails are single track, but have service trails connecting each section, many of these service trails are steep and rocky in parts and can be used to create longer and harder rides.
